Style 405, with optional hinged door fittings "Exclusive", Nordic Pine

Individual designs

Design your own timber door: A simple drawing is enough for us to manufacture an individual door for you using a computer-aided mill.

Setting accents

Choose from 3 natural stones. In styles 403 and 404, natural stone is used as an attractive design feature. Variations in colour and structure are a natural characteristic.

Tropical-green

Multicolour-red

Balmoral-rosso

On request, each garage door can be supplied with a matching side door.
